

KERN

Laser Systems

The **OptiFlex** is a high performance, large format laser cutting and engraving system. The most popular and versatile machine in Kern's product line. Ideal for processing metal, wood, textiles, and foam. Features high speed engraving capabilities.

The **HSE** is an entry-level, large format laser cutting and engraving system. The HSE machine is economical and ideal for processing light gauge steel, acrylic, wood, textiles, and foam. Features high speed engraving capabilities.

The **LaserCELL** is a high performance, Class I (enclosed) laser cutting and engraving system. Ideal for processing metal, acrylic, wood, textiles and foam, with high-speed engraving capabilities.

The **FiberCELL** is a high performance, Class I (enclosed) metal cutting system. Ideal for mild steel, stainless steel, aluminum, brass, and copper.

The **OptiDual** is a high production laser cutting system. Features two lasers mounted on a single gantry. Ideal for processing light gauge metal, acrylic, wood, textiles, foam, and more.
