

STM Series

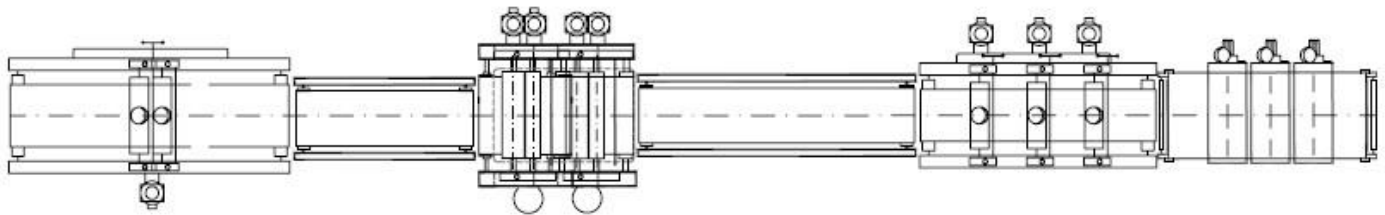

Roll Coat Systems for Panels, Doors, and Flooring

The STM Series finish system is designed to *Roll Coat Finish* a full range of panel products utilizing water base finishes, stains, and 100% solids UV coatings. The systems accommodate widths up to 48". We additionally offer a 12" width model for lab applications and sample work.

STM lines are affordable, compact, and require low amperage to operate. They offer the ability to utilize the latest "green" finishes and are ideal for quick changeovers. We can configure your line with a complete range of machines including sanding solutions.

STM provides full service backup for your machines to include line setup and training. Call us today for a free demonstration at our finish lab.
